ACCESSORIES AFTER THE FACT (Bobbs-Merrill, NY, 1967)

The Third Decade's tributes to Sylvia Meagher tell of the critic and friend and her place in the exposé of the truth.
Her book is a plateau unto itself.
Not a diagram, not a photograph, not one iota of distraction from her central theme that the government's report on the murder of the President is shot full of holes, fore and aft and thwartships, cannot withstand scrutiny and displays conclusions any little-league benchwarmer would instinctively reject.

Leo Sauvage's introduction says this better :

> ....Even though Sylvia Meagher's book was not among the first ones published, she is often able to add new information, sometimes a new angle, and her presentation of the point under discussion is always the most documented, the most scrupulously accurate; in short, the most reliable. Of all the books written on the Kennedy assassination, including the Warren Report, Accessories After The Fact comes closest to being THE reference book on the subject .....
> (p xv)

And the author says it herself :

> ....Nor is it the critic's responsibility to name the person or persons who committed the assassination if Oswald did not -- another characteristic non sequitor. It is on the other hand, clearly the responsibility of the authors and advocates of the Report to explain and justify its explicit documented defects. If they cannot or will not, then let the Government which has given us such a profoundly defective document --at a cost to the people of well over a million dollars -- scrap the Report and commission one that will sustain its assertions and conclusions and survive the test of close scrutiny ....
> (p xxiv)

> ....the author's purpose has been to reach as many people as possible with a message that has lost none of its urgency or importance during the years which have elapsed since the publication of the Warren Report. It is hoped that message has been made apparent in this study between the raw evidence and the misleading and sometimes spurious presentation of that evidence by the Warren Commission ....
> (p 455)

> ....A scrupulous and disinterested investigation -- even now at this late stage and despite the death of several key witnesses during the past three years -- must once and for all resolve the question of Oswald's guilt or innocence and establish whether or not he was even implicated in the crimes of which he stands accused and, for all purposes, convicted and punished. It must almost inevitably point also to the identity of those who are guilty of the assassination and the collateral murders .....
> (p 456) (co

ACCESSORIES AFTER THE FACT

Were it not for the truth of the matter we could laugh at Sylvia's concern that four long years existed between the assassination and Accessories. As it did at publication, 22 years later it continues to expose conspiracy, chicanery and coverup flaunting not only law, medicine and physics but also the commonsense we all enjoy and occaisonally display. Where is the moxie for the reaction she made?

That the truth is still hamstrung and confabulated by dysinformation and worse is a tribute to the Media whose sit-com by-passing of threats as clean as Accessories, combined with meatier handling of lesser lights, has kept the answer to who killed JFK well-flummoxed and discombobulated. Harping ad nauseum on the odd-ball loner who couldn't keep a job, the names of the Dealey Plaza death squad are unknown outside the buff's lunatic fringe, and the need-to-knows of the intelligence community.

On the chance accessories might mean rifles, walkie-talkies, SS badges and the like, we sought advice of counsel: accessories after the fact are People. Accessories After The Fact is after People. It points to those people who conspired, hob-nobbed and otherwise knew of the murder before it became an assassination, the prime targets, or should be, of the local, DPD, national, FBI, and international, CIA, police.

Accessories' prime targets are those who stumbling onto the facts of the coup d'etat joined the smothering, the destabilzation and destruction of the truth. Those accessories after the fact writhe under Sylvia's glasnost. Hoover, Dulles, McCloy, Ford, Rankin, Belin and Specter come immediately to mind.

On the speculation, if you will, that the professional war machine keeps its top echelon well informed the better it can function on its own behalf, make a list of those who today know damn well Oswald did not kill the President. Convince yourself of today's accessories after the fact.

Since XI/63 Presidents, Vice Presidents, UN Ambassadors, Secretaries of State, Defense and Justice, NSC advisors, Directors of FBI andCIA and NSA, as they assumed office,were made privy to the secrets to be held in order to hold office.

Members of the Judiciary, the Congress and the Media have been admitted into PWM's "intelligence" bureaucracy. It's an impressive, notorious bunch constrained by secrecy (occasionally referred to as national security) from taking any human(e) action (s). Vance and Clark, W. seem to be the only members who didn't give a damn about being PWM defectors.

Sylvia's insistence on resolving Oswald's innocence or guilt can be satisfied by anyone willing to research and correct GKGP's alias OSWALD. Copies will be donated to those who undertake this task and submit a written review. It is the least we can do for our friend.

THE GOVERNOR's RIGHT SHOULDER ...after Z-223

Preparing Two Flightpaths for David Lovett's kind edition and not looking for anything at all (the best way to conduct intensive research, we paused at page 48, remembering the spring night in 1981 when rumonations with Neil turned inward to chack the pattern of the Governor's shoulders set forth now, eighteen years ago.

Suddnely the right shoulder motion, forward then backward, rang a belll we have been sounding since 1972 when our ninth-anniversary article on Dealey Plaza was set aside because one of the drawings omitted the hallowed second shot to the President's head from th e grassy knoll. Thirty-five gestation months and The Umbrella Man was born and immediately wed to the Throat Wound of entry.

As GKG readers know only too well, using the single shot to the President's head is our favorite example of the laws of motion, all three of them. In the buffs' ballpark, left field is always full of fresh air and fun. Page 48 was one of those bloopers that fell into our mitt without our having to move a single inch. Post eye-squint was the only exercise required.

Page 4 shows the 1981 variations (*) and the 1977 notes on reading Itek's Report (part, column). Be advised the scientists who wrote it worked with the original Zapruder film. Of course they picked up details no unaided eye could find. Early researchers did all that could be expected.

Arlen Specter helped his Single-Bullet Theory by finding the hand rising above the level of the door in Z-229. The Governor picked Z-234 as his hit-frame. His wife picked Z-229. Six Seconds in Dallas established Z234-238 until TF moved it to Z-227 and finally Itek settled the matter : The Governor was hit at Z-223.

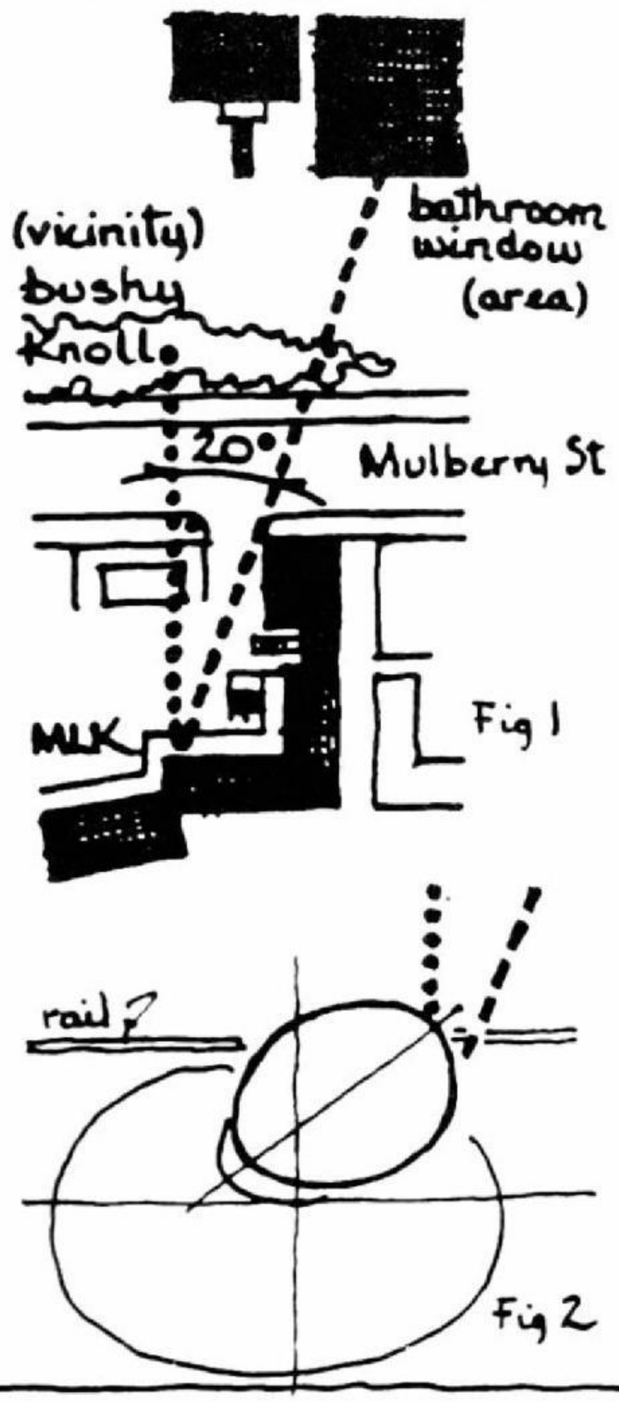
In the left-hand column you can "see" :

at Z-222 : the right shoulder, left to itself,maintains its condition in motion, unchanged....
at Z-223 : the change in motion indicates a force due to the presence of another body, the bullet from Seymour's gun, fired from TSBD window VI #14, that ricochetted off a twig....
at Z-233 : the equal and opposite reaction to the force of the bullet moves the right shoulder aft.

If you can accept Newton and Galileo, backed up by experiments by Alvarez and Lattimer, please check GKG IV/85 and rid yourself of non-existent second shot to the President's head from the grassy knoll. Consider the right shoulder an added "experiment".

One last word of caution: one-banana, two bananas, three bananas, four may be just right for counting seconds. You will have to figure out for yourself how you are going to imagine, think and count in eighteenths and ninths of a banana. Good luck. ▼

~~WE SHALL~~ WE ~~HAVE~~ OVERCOME



Martin Luther King jr was killed by a shot fired from a little below and almost directly ahead of him . ..... in Figs 1 & 2

The FBI, being privy to Raoul's rushing out of the rooming house bathroom and leaving the rifle on the sidewalk before driving off in a white Mustang, told the media the fatal shot came from the bathroom. -----in Figs 1 & 2

The media swallowed the bait, the hook, the line and the sinker and that's how the public found out James Earl Ray killed MLK from out a bathroom window.

Those who have James' Tennessee Waltz know he was in his white Mustang trying to get the spare fixed when the bushy knoll assassin fired the fatal shot.

Fig 2 shows HSCA's reconstruction of the crime with MLK at the motel balcony rail turned "slightly" to his right (30 degrees)

It doesn't take much savvy to figure out a shot from either lair, and HSCA did discuss the bathroom "area" versus the knoll "vicinity" that neither shot could inflict the wound of entry on the right side of the head found at autopsy. The "area"/ "vicinity" difference was slight enough to make coverup a cinch for HSCA's experts.

Twnety-one years later PWM, the professional war machine, is adrift and awash, a mere figure of speech, its missiles returned be-headed, its advocates begging for funds to pay its lawyers haggling over national security niceties, its ranks reduced to Rambo-Contras for whom change will never be anything but something loose in pocket.

This remarkable turn of events, precipitated by the backlash of PWM's last-ditch insanities over the islands of Sakhalin and Grenada, is the cutting edge of the equal and opposite reaction to half-a-century of banana-republic autocracy which could not deviate from the military solution that comfortably predates the Sphinx.

As "autonomy" and "arbitration" replace "foreigner" and "enemy" as the buzzwords of the nineties, the transistion towards everything that Martin Luther King jr held dear can be attributed to his perseverance over and above the call of duty.

Wherever station WKAG is, it has the media-sent opportunity to promote and otherwise smother everyone in this neighborhood we all call Earth With Kindness And Gentility.

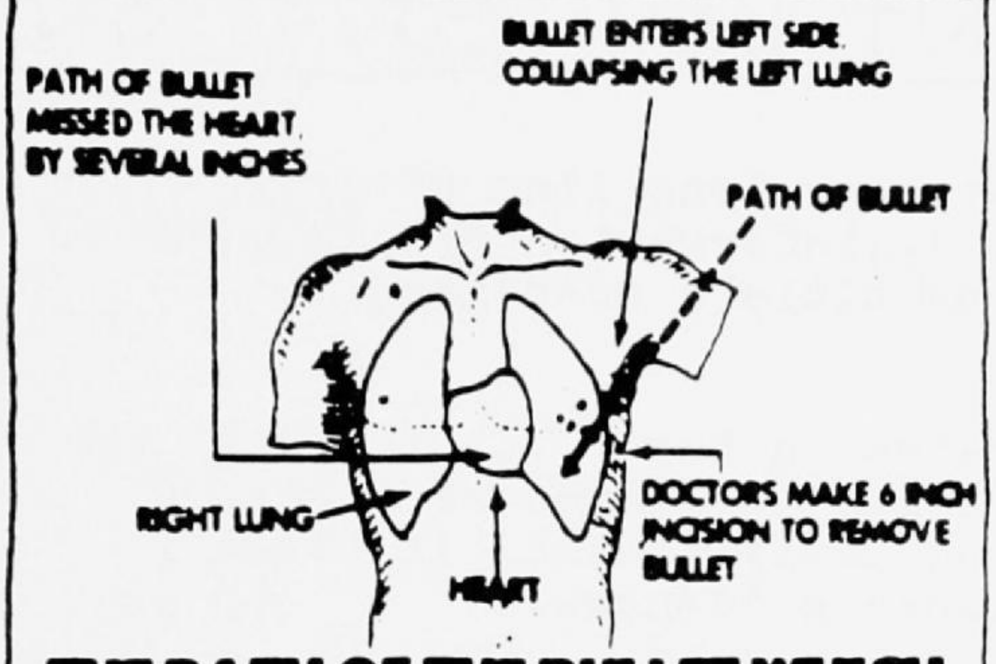
REAGAN DOESN'T KNOW WHAT HIT HIM .... he is not alone.



BULLET ENTERS LEFT SIDE, COLLAPSING THE LEFT LUNG
PATH OF BULLET MISSED THE HEART BY SEVERAL INCHES
PATH OF BULLET
RIGHT LUNG
DOCTORS MAKE 6 INCH INCISION TO REMOVE BULLET
HEART

THE PATH OF THE BULLET WHICH STRUCK PRESIDENT REAGAN

On III/30/81, Hinckley's six shots decked three men, broke a window across T St and twice scarred the limousine. The diagram of the Reagan wounding omits the ricochet off the 7th rib as later news items did, but the downward, left to right and BACK to FRONT shows the missile entered whenthe left arm was extended upward.

No bullet from Hinckley's gun, 32" below and slightly in front of that wound could cause that slit-like gash. Extending the track backward, upward, locates the shooter on top of the retaining wall that curved away from where Hinckley crouched at its base.

Furthermore there is a 2.8-second whistle-sound on the NBC, CBS and ABC tapes which precedes the seven shot-sounds heard on each. A sort of updated, "You may fire when ready, Gridley."

Despite the bold,black lettering in the title, the FBI mamaged to hoodwink everyone into a ricochet-off-the-limousine wounding. The grimace seen on the cover of TIME shows he was hit a half-second or so ago .. and his left arm is lowering. This is a good two seconds before he was shoved into the car.

No one questions the grimace on the President's face at Z-225 in the Zapruder movie of the Dallas hit. When the FBI saw Reagan's grimace it reverted to its Dedgar Hoover days and reported Reagan was hit by a bullet ricochetting off the car-body as he was shoved into the limousine.

This creates a wound (out of thim air) in the front of the chest which tracks slightly downward, left to right and FRONT to BACK, the direct opposite of the scar Reagan carries to this day.

This fiction was carried thru into testimony in the Hinckley trial and it has never been questioned by anyone in authority, which again is exactly par for the course.

One more damnfool CIA/FBI patsy-setup and the lone-assassin myth rides again Oswald, Ray, Sirhan, EMK, Hinckley and Kazmin (KA 007)

WHO SHOT PRESIDENT KENNEDY? NOVA #1518

Aired XI/15/88, this is the latest in a long line of accessories after the fact. Outmoded research, dysinformation and judgmental errors make no attempt to answer the title's question.

NARRATOR
....the single bullet theory remains in tact .... there is no irrefutable photographic or acoustical evidence of a second gunman. The President's body was so badly handled it probably can never be a source of irrefutable evidence.... (p 23)

Terrified-media hogwash. The Single-Bullet Theory was still-born when Specter delivered it .... there is ample photo-evidence of two, three, four gunmen .... NOVA's stars, Barber & Vaughan, killed the "acoustical evidence" .... NOVA's photos and drawings of the president's body present "irrefutable evidence" and Lifton's finding of pre-autopsy surgery is NOVA's finest hour.

The by-passed photo-evidence establishes this firing sequence, with deductions not on film in (parens) :

Z-150 : The Governor turns to his right on hearing the first shot-sound .. (the bullet misses the limo, scars Main's pavement) and curb .. (a fragment wounds) Tague.
Z-188 : The President is hit in the throat (by a flêchette from the Overhead Flêchette Launcher held aloft on the grassy knoll, the limo side of Stemmons .. the 3x1 1/2-inch "tracheotomy incision" seen at autopsy (was inflicted exiting the flêchette by extraction during pre-autopsy surgery)
Z-223 : The Governor is wounded, back to front, through the chest and right wrist.
Z-225 : The President is seen reacting to (being wounded in the back by a bullet at Z-220)
(This is better timing for the single-bullet theory than Specter ever dreamed of ..but .. the President's spine blocks CE 399's traverse from 2" right of midline to the neck's anterior midline)
Z-312/313 : The President is wounded, back to front, by a bullet through the top of his head .. the equal and opposite reaction snaps it aft .. (a fragment lodges in the Governor's thigh .. it is still there)

During Xmas-week 1976, HSCA's staff was breifed on the JFK conspiracy. Within four months the Chairman, Counsel and some staff were cashiered. The Committee's findings "on the basis of the evidence available", ignored the truth and sang CIA's song of Coverup.

NOVA's "analysis of the physical evidence" echoing HSCA's refrain echoing the Warren Report's 3 shots, 1 assassin, cannot escape becoming a non-person accessory after the fact full of sounding brass and clanging cymbal.... (Sylvia we need you)
